

Smoke Blocker (Two Panel)

The Smoke Blocker is the fastest and easiest to erect a smoke barrier in a door way with obstacles to block it's spread. Easy to install and featuring a fully self-contained design, which does not require the use of tools. The Smoke Blocker is over sized by design, fitted with fire retardant ties, equip with a heat resistant window and features a leather re-enforced bottom to prevent chafing of the chain pocket.

Product Features <http://www.slaterivercorp.com/smklbr.htm>

- Fully self-contained
- Requires no installation tools
- Robust and extremely durable
- Oversized to allow wrapping around obstacles in door way
- Fitted with fire retardant ties
- Heat resistant window allows viewing of space
- Leather re-enforced bottom
- 100% Made in USA
- Berry Amendment (USC, Title 10, Section 2533a) compliant
- Available in two sizes standard and large

Material:

- 13oz. vinyl laminated polyester fabric – Flame Retardant NFPA 701 (450-500 degrees)
- Thread 92 Bonded Kevlar
- Clear Vinyl Window .20mil Flame Retardant NFPA 701
- 2" 3-M reflective flame-resistant stripping
- 3M Hook & loop closure
- Brass grommets #1
- Brass grommets #3
- Chain weight bottom 3/8
- Brass screws: D5038-P-SB-3/8
- Suede leather bottom cover
- Ties 1/8" Hi Temp Fiberglass

Size and Pricing:

- Standard 82" by 54" \$525.00 Slate River Part Number SRSK-001WM
 - Large 92" by 92" \$690.00 Slate River Part Number SRSK-002WM

Four key improvements that increase effectiveness and durability of the Smoke Blocker shipboard over standard smoke curtains.

A fire-resistant window allows investigators and other personnel to view the space without opening the smoke blocker.

Fire retardant ties situated around the perimeter enable securing the smoke blocker around obstacles or to other points to create a better seal.

A heavy duty re-enforced leather bottom prevents damage to the bottom of the smoke curtain from non-skid decks. Preventing fraying of the chain pocket

The smoke blocker is oversized allowing for fire hoses, desmoking and other equipment to be sealed preventing leaks.

NEW PRODUCT -- Fire Blocker (Two Panel) Standard 82" by 54"

Concept is the same as above smoke blocker but for use in a ship availability where doors have been removed. Focus is on changing material to block fire spread, stronger grommets, two panel, removes the window, and reflective tape.
